DBMS Assignment - 2

Qns 1: i) Entity Relationship Diagram
ii) Relational
iii) Objected-oriented
iv) Integrity

Qns 2: Data abstraction means hiding complex database details and showing only important information to users. In healthcare system, it helps doctors, nurses and staff access, patients, records easily.

There are three levels of data abstraction

Qns 3 i) Improves data security & privacy

Benefits: ii) Makes the system easy to use for healthcare staff.

iii) Provides data independence, so change in database structure do not affect users.

Challenges: i) Implementation complexity
ii) Performance overload
iii) High development cost
iv) Training requirements.

Hom-C

Student (stud-ID(PK), Name, Email, Phone, Department)
Course (Course-ID(PK), Name, Credits, Department)
Professor (Prof-ID(PK), Name, Department)

Relationship

- 1: Student - Enrolls - Course m:m
- 2: Prof - Teaches - Course 1:m
